Attempt all the questions.

Part A

Q 1: Encircle the correct option for the following statements:

[10 Marks]

[CLO 2. Describe a variety of major issues and theories in Psychology]

1. A student feels nervous before a class presentation but performs well and relaxes afterward.

This best represents:

- a) Panic Disorder
- b) Normal Anxiety
- c) Generalized Anxiety Disorder
- d) Social Phobia

2. Fear of being in a crowded shopping mall because escape seems difficult is a hallmark of:

- a) Agoraphobia
- b) Panic Disorder
- c) Specific Phobia
- d) Generalized Anxiety Disorder

3. Which of the following most accurately describes self-awareness in emotional intelligence?

- a) Recognizing emotions in others and responding appropriately
- b) Understanding one's emotions and their influence on behavior
- c) Suppressing emotions to achieve professional goals
- d) Using emotional cues to manipulate social outcomes

4. The main focus of CBT is on:

- a) Past Experiences
- b) Present Thoughts and Behaviors
- c) Subconscious Drives
- d) Relationship Patterns

Nation

10. A therapist focuses on reinforcement and

5. The S factor in Spearman's theory:

- a) Remains constant across tasks
- b) Represents general intelligence
- c) Is learned and varies by activity
- d) Is inborn and universal

6. A patient firmly believes that a famous, high-status individual they have never met is secretly attempting to communicate their undying love to the patient through coded messages in the daily newspaper. This false belief is best classified as which type of delusion?

- a) Persecutory Type
- b) Grandiose Type
- c) Somatic Type
- d) Erotomanic Type

7. A person believes their neighbor is plotting against them, despite lack of evidence. They also hear their neighbor's voice whispering insults when no one is around. Which of the following statements is true?

- a) The belief is a hallucination, and the hearing voices is a delusion.
- b) The belief is a delusion, and the hearing voices is a hallucination.
- c) Both the belief and hearing voices are hallucinations.
- d) Both the belief and hearing voices are delusions.

8. A patient reports to the clinician that they often experience a sensation of small insects crawling across their skin, and they are sometimes overwhelmed by the distinct smell of burning wood, despite there being no fire nearby. The symptom of experiencing the smell of burning wood is an example of:

- a) Visual Hallucination
- b) Delusion of Reference
- c) Olfactory Hallucination
- d) Tactile Hallucination

9. A clinician notes that a patient with schizophrenia exhibits minimal spontaneous speech and brief, unelaborated responses. This presentation reflects a reduction in normal expressive capacity rather than the addition of an abnormal behavior. It is therefore best classified under which symptom cluster?

- a) Negative Symptoms
- b) Positive Symptoms
- c) Cognitive Symptoms
- d) Catatonic Symptoms

10. A therapist focuses on helping a client identify and replace maladaptive behavior patterns using reinforcement and extinction principles. Which assumption underlies this therapeutic approach?

- a) Behavior is a reflection of unconscious conflict.
- b) Both adaptive and maladaptive behaviors are learned.
- c) Emotional awareness precedes behavioral change.
- d) Insight into childhood experiences is necessary for change.

[CLO 2. Describe a variety of major issues and theories in Psychology]

Q.2.

- a) Distinguish between Schizophrenia and Schizophreniform Disorder by comparing their required symptom durations, and state the complete time frame for Brief Psychotic Disorder. **[1+1+1=3 Marks]**
- b) List one core behavioral and one psychological symptom of Anorexia Nervosa. **[1+1=2 Marks]**

[CLO 2. Describe a variety of major issues and theories in Psychology]

Q.3. Students in computing programs often face challenges such as logical problem-solving, teamwork, and project-based learning. Explain how Gardner's Multiple Intelligence Theory and Sternberg's Triarchic Theory can be applied to understand the different types of intelligence (explain at least 3 types of each) that contribute to students' success in computing disciplines.

[1+1+1.5+1.5= 5 Marks]

[CLO 3. Recognize the key role that Psychology plays in our everyday lives]

Q.4. Mary is a 21-year-old university student who has been feeling anxious for the past six months. She constantly worries about her grades, her family's financial problems, and even minor things like being late for class or losing her notes. She often feels restless, finds it difficult to concentrate, and complains of muscle tension and insomnia. Her friends say she "overthinks everything." Despite reassurance, Mary says she feels "something bad will happen" even when there's no reason.

- a) Give the most appropriate diagnosis for Mary. Explain your answer by referring to the diagnostic criteria. **[2 Marks]**
- b) Identify the cognitive, behavioral, and physical symptoms evident in her case. **[1+1+1=3 Marks]**

[CLO 3. Recognize the key role that Psychology plays in our everyday lives.]

Q.5. Students often experience academic stress, performance pressure, and emotional exhaustion due to intense coursework and project deadlines. Discuss the goals of Cognitive Behavioral Therapy (CBT) and Dialectical Behavior Therapy (DBT) and explain with example how each approach could help students in computing disciplines manage such challenges effectively. **[2+3=5 Marks]**
